GENERAL INFORMATION

BLACK SALVE & TABLETS

The information contained in the material is largely based on testimonial, accumulated over a period of 28 years from people who used the CLEANSING TIME PRODUCTS to their satisfaction for health and enhancement.

Our Products:

- Contain Natural Organic Herbs and Minerals that neutralize carcinogens prior to their stimulating any tumor growth.
- Our product works directly on the immune system and acts as a preventative when taken internally.
- One Herb has a substance that prevents tumorous cells from multiplying once they have started.
- Another Herb has a substance that detoxifies the blood and the body in general.

CASE HISTORIES REVEAL WIDE VARIETY OF HEALING

Case histories revealed that formulating the proper portions of various herbs can result in a wide variety of healing abilities. The following information is provided for the different uses of CLEANSING TIME (Black-Salve) or tablets.

1. Internal malignancies in the liver, kidneys, colon, prostate, female sex organs, breast, lung and throat areas to name a few.

2. Through internal ingestion, a variety of fungi, viruses, and bacteria have been repeatedly prevented and overcome: such as, flu, colds, strep throat, mouth diseases and yeast infections.

3. Externally in the form of sun skin damage or wart and mole removal.

4. Removal of plaque from teeth and diseases from gums by mixing Black Salve with toothpaste. Squeeze toothpaste into another container and mix the salve into the toothpaste till it is a light brown in color, brush twice a day for 3 months.

5. Detoxifying the body by ingestion of one (1) CLEANSING TIME TABLET DAILY for a "twenty-eight (28) day run." This will also induce oxygen

into the system and affected areas thereby further inhibiting carcinogen growth.

6. CLEANSING TIME TABLETS provide a high level of organic calcium and potassium, the anionic minerals needed to energize the liver in a manner that stimulates natural healing enzymes from the liver to every part of the body, thereby creating proper functioning of the system.

7. Alleviating yeast infection, candidiasis in females with the usage of one (1) level teaspoon of the "BLACK SALVE" per quart of warm water to douche with. Use one half (1/2) of that same salve portion to bathe any external areas affected.

8. For lower colon problems, use the same portions as described above with an enema. In each instance, leave solution internally applied for at least ten (10) minutes. Plus take one CLEANSING TIME tablet for twenty-eight (28) days.

CLEANSING TIME Tablets INTERNAL Directions

Day One: Take one (1) tablet after a full meal.

Day Two: Take two (2) tablets after a full meal.

Day Three: Take two (2) tablets in the morning after a full meal; Take one (1) tablet in the evening after a full meal.

Day Four: Take two (2) tablets in the morning after a full meal; take two (2) tablets in the evening after a full meal.

Continuing at four (4) tablets a day as described in Day Four.

Working on a Problem -

Never go over four tablets in a day. There are 300 mg. of herbs that go into each tablet and that is enough for the body. If four (4) tablets a day causes any discomfort or nausea, cut back to three tablets. If you cannot tolerate that many, cut back to your own comfort level. Everyone is different, therefore one has to adjust.

Maintenance Program Only "28 Day Run"

For general cleansing, detoxifying the body and fortifying the immune system, follow these directions for the "28 Day Run"

This procedure gives the body a rest and allows the organs, glands and system to perform their natural functions unaided during the two (2) day resting time.

This same procedure done once every four (4) months may help prevent future viruses or malignancies from starting.

- After a full meal, take one (1) CLEANSING TIME tablet for seven days, then abstain for two days.
- Repeat the process until a total of thirty-four (34) days have passed.
- You will have taken the tablet for a "28 Day Run" after the thirty-fourth day.

History of the "BLACK SALVE"

The "BLACK SALVE" is not a pharmaceutical preparation endorsed by the medical profession. No guarantees or claims can be made about the effects or results from using "BLACK SALVE".

The "BLACK SALVE", made of various herbs, is a natural Herbal healer which has been used to heal people and animals of external and internal malignancies, tumors and a wide range of viral infections. The reason it is called "BLACK SALVE" is because the herbs that are in the salve are red in color to begin with. In a short time after the salve is made it turns black.

An early pioneer family was introduced to the "BLACK SALVE" by Native American Indians. The formula was passed down in that family for three (3) generations. For many years "BLACK SALVE" has been used to eliminate malignancies not only in humans but in cows, to save herds of calves from early viral diseases, treat sarcoids on horses and to treat abnormal tissue growths in all kinds of pets (animals).

One of the original members that made the "BLACK SALVE" was first to use the herbs internally. He had been diagnosed as having colon malignancies in the 1960's. After he checked himself into the hospital for surgery the night before, he took the first dose of "BLACK SALVE" in a capsule without telling his doctors. The next morning they postponed his surgery because he was having cramps as the salve had started to work in his system. He then continued

to take the Salve for five (5) more days. On the 5th day he said he passed a large quantity of black, vile smelling feces. Apparently the growth itself. When the doctors took x-rays they discovered that the malignant growth was gone. He lived another 25 years without any malignancy.

I used the "BLACK SALVE" on myself for skin malignancy on my breast and on my own family members, for tumors, virus moles and yeast infection. I take it internally for a "28 Day Run" for general detoxification of the inner body every 4 months.

After becoming good friends of one family member, and a devout advocate of this product, I was given the formula. I then set out to heal the world. For the past 28 years, I have worked with the "BLACK SALVE". I have helped people from all walks of life in the United States and Canada. I base everything I know on case histories, how the "BLACK SALVE" has worked both internally and externally.

For convenient internal use we produce the CLEANSING TIME TABLETS. The tablets have the same active ingredient as the Salve which consists of Bloodroot, Galangal, Red Clover and Sheep Sorrel. Each tablet contains 300 mg. of Salve and 325 mg. of calcium phosphate which is used as a binder for each tablet. The products are processed at a company in the United States that meet the Food and Drug Administration's Good Manufacturing Practices.

CLEANSING TIME "BLACK SALVE"

EXTERNAL USE

(Read Very Carefully -Use Caution)

The "BLACK SALVE" is NOT a gentle healer. In many cases it is a relentless substance which hunts down and penetrates all abnormal tissue. Pain, swelling, redness around the area, and sometimes fever is associated during use. "BLACK SALVE" completely eliminates abnormal tissue and stimulates regrowth of healthy tissue. More than half the people who have used "BLACK SALVE" have reported that they ended up with a moderate or heavy scar when they used it externally of their skin. This is why when using the salve you always "keep it soft" with Vaseline or vitamin E ointment to help with the healing of the skin.

The following are recommendations based on what the majority of users have found so far to be effective. These recommendations describe the absolute MINIMUM doses that people have found to be effective. It cannot be stressed enough that "BLACK SALVE" is very potent. Do not assume that if a little works, more will be better. Use the smallest dose possible and increase only if it seems necessary. More will extend the healing period much longer than necessary. Everyone is different so proceed cautiously. This salve will cause a burning sensation if there is malignancy or a virus present. Begin with a small amount of salve; just enough to cover the area.

DO NOT OVER DO IT!

Follow the directions below

1. Apply a sufficient amount of CLEANSING TIME "BLACK SALVE" to cover the affected area. First prick around area with a sterilized needle for better penetration. Apply Vaseline to gauze portion of the bandage and cover the treated area for twelve (12) hours. If a malignancy or virus is present, you will feel a burning sensation and a dark pus scab will begin to form.
2. Remove the bandage at the end of twelve (12) hours. Rinse thoroughly with hydrogen peroxide on a cotton ball or Q-tip. If the salve has penetrated the skin, you will see a red ring around the area and a grayish-white coloring will have appeared with a degree of swelling indicating the salve is at work. DO NOT DISTURB this area, just make sure the salve is washed off as best you can. If only a small area in the treated area is red and grayish-white in color, you may wish to apply an additional amount of CLEANSING TIME "BLACK SALVE" for another twelve (12) hours and repeat the same cleaning process.
3. Once or twice a day, clean the edges to keep them loose and free of pus and pain with hydrogen peroxide.
4. DO NOT LET A HARD SCAB FORM. Keep it soft with Vaseline. Five to seven days, could even be up to two (2) weeks, depending on how deep the infection is in the body. It should show the core loosening up and trying to work its way out, it may just drain out.
5. Swelling will most likely occur and the malignancy will be painful and/or itch. This is a normal reaction. The growth will

change color after the first day and may even become "dead white", there will be pus as the body ejects the mass. Just keep it clean.

6. Keep changing the bandage and cleaning the area until healed.

Do as many applications as necessary to penetrate the skin- only when you see the way it is described in No. 2 then do not apply again.

DO NOT TRY TO PULL OR FORCE THE CORE OUT OR TRY TO DISSOLVE IT ... LET IT DO IT'S OWN THING.

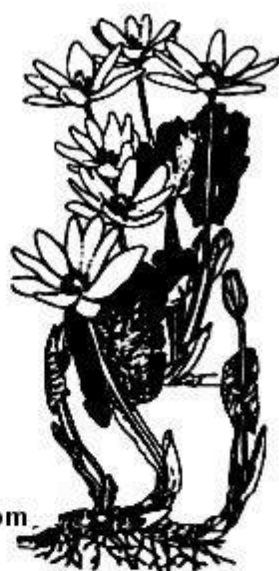

AFTER THE CORE COMES OUT

After the core comes out you will have a hole in your flesh but new skin will have already formed so it normally doesn't bleed. Keep it clean, soft and bandaged until the core area is filled in, new skin is formed and healed completely. It is advisable to try the salve in a place other than your face on the first application. You can experience the process and its function.

Note: If the salve dries out after a while, just add water to make it moist again. "BLACK SALVE" is somewhat acidic. It is best to use wooden or plastic utensils when handling "BLACK SALVE".
